

I am writing to encourage you NOT to pass anything that would alter Indiana's telephone privacy...I have been very happy to have almost no telephone solicitors calling at dinner time, late at night, etc. etc. This allows me to enjoy a better quality of life with my family. Please DO NOT "water" this down with any national plan that would allow companies that consider me an existing customer to break this privacy. Thank you for your attention to this matter.

Sincerely,

Todd A. Regina
